Introduction

Geo Technical Services, Hyderabad provides consulting services in geotechnical and geo physical testing services with highly experienced Geo Technical Consultants to handle the different project works. We are a medium-sized organization; we have professionally registered engineers including many acknowledged leaders in their specialist in geotechnical and geo physical fields. We take pride in encouraging growth and innovation among our young professionals.

Our goal is to provide our clients with sound technical advice suited to their project in a timely and in a cost effective manner. The result is a flat company structure, with a strong base of technical expertise reflected in numerous small teams of experts working together.

History

As our group of Geologists and Geo Technical Engineers are experienced in the field of Geo Technical Investigations since 30 years.

Our Team has executed more than 3000 projects including 1000 major bridges, 1000 residential & commercial complexes and many power projects for Central/ State Government and for corporate sector.

Geotechnical engineering has been a core focus since our inception. Our geotechnical engineers and engineering geologists provide integrated site investigation services, geotechnical designs and construction support on a wide range of projects including foundations for different industrial and mining developments, power stations, dams, canals,

roads, railway lines, box-cuts, declines, Wind turbine shafts, and more. We work closely with other consultants and contractors to provide practical and effective solutions to challenging problems.

We offer expert review of geotechnical reports and designs by others through industry leaders in the field of geotechnical engineering.

Certifications

We are empanelled by NHAI, Hyderabad Urban Development Authority (HUDA), MCH, R&B, South Central Railway, APPPWD, and APERL.

Services

Our services are summarized into the following types of engineering works:

- ✓ Foundation/soil investigation

- ✓ Ground water investigation
- ✓ Drilling and grouting
- ✓ Lab Testing and computation
- ✓ Report generation with recommendations for various types of foundations.
- ✓ Mining resources services

We also provide the following engineering testing works:

1. Field Tests

- Penetration tests
- Plate load tests
- Cyclic plate load tests

- Pile load tests
- Pressure meter tests
- In-situ permeability tests
- Field and Lab California bearing ratio tests

2. Geo Physical tests

- Electrical Resistivity tests
- Resistivity profiling
- Seismic refraction test

3. Laboratory testing

Lab tests on soils: Well established laboratory, situated at uppal, Hyderabad. We conduct the following lab tests as per IS standards on soil.

Water content, grain size analysis, specific gravity, plasticity limits, compaction tests, unconfined compression test, direct shear tests, axial shear tests, vane shear tests, permeability tests, consolidation tests, swell pressure tests, Differential free swell test, and chemical analysis etc.

Lab tests on Rocks: specific gravity, porosity, water absorption, moisture content, point load index, hardness, UCC etc

Chemical tests on water/soil/rock: pH, colour, odour, turbidity, sulphates, chlorides, nitrates, organic matter, carbonates etc.
